Introduction:

This report details my internship experience at NullClass Edu Pvt Ltd Company, a leading real-world experience training firm.

Background:

Having skills in Power BI and Tableau software for creating HR and job dashboards which provide appropriate insights. As a result, I can now use this information for decision-making purposes like recruitment process among other aspects concerning human resources.

Learning Objectives:

- **Cleaned Up Data:**
I learned how to take messy data and organize it for easy use.
- **Built a Visual Dashboard:**
The demonstration of various crucial details by use of visually appealing charts or graphs such as a trendy infographic is what I did.

Activities and Tasks:

- Created a chart between company size and company name where company size<50000 and job title should be mechanical engineer and experience should not be more than 5 years and country should be Asian as well as salary should be more than \$50k and the work type should be both part time and full time and ignore all other work types and the preference should be male. We should filter candidates those who are applied on idealist and this chart should work on only between 3 Pm to 6 Pm.
- Created a chart between company size and company name where qualification='B. tech, M. tech, PhD' and work type='Full time'. The country should be African continent and ignore other countries. Job title should be starting with letter 'D' and preference should be a Male. The company size should more than 80000. The contact person should be starting with letter 'A' and job portal should be indeed. We need to place a latitude and longitude and if we click on latitude and longitude we will open a map and show the exact location.

- Created a chart between company size and company name where country='India and Germany', qualification='B. tech' and work type='Full time' where experience should be more than 2 years and job should be Data Science and salary range should be more than \$100k. The India details should be on orange color and Germany details should be on green color. The job portal should be indeed and preference should be female. The job posting date should be below 08/01/2023 and job portal should be indeed. This chart should swap color after 12 PM to 6 PM.

Skills and Competencies:

- Developed strong research and sourcing skills to identify the desired candidates.
- Gained expertise by using the company's dataset and ETL process
- In a real platform, time management and organizational abilities were improved.

Feedback and Evidence:

- Performed the dataset cleaning process within the stipulated time
- Successfully performed the tasks that was assigned to me.
- Maintained a well-organized dashboard and generated accurate reports for the team.

Challenges and Solutions:

- Cleaned the dataset, processed and loaded it in Tableau.
- Created insightful charts, graphs and filtered according to it.

Outcomes and Impact:

- Performed the tasks and filtered out the candidates who were applicable
- Contributed to team success by providing insights
- Gained an real-world experience through this platform.

Conclusion:

This internship provided invaluable experience and provided me all the essential skills that are required in a real-world based job scenario for a career in Data Analyst.

I am confident in my ability to contribute to the NullClass team and am eager to continue learning and growing in the industry.

Thank You
